

Generic Premium

With Generic Premium, you have coverage for low-cost generic drugs, plus some of the most common brand drugs. That means you can get the medicine you need, while saving money.

What is Generic Premium?

Generic Premium can help you lower your prescription costs by covering most generic drugs. Some brand drugs are covered by Generic Premium too. They include drugs that treat common conditions like high blood pressure, diabetes, high cholesterol, ulcers and more. So you can choose from a wide range of quality drugs.

Generics can help you save

Generic Premium encourages you to use generic drugs. Why? Generics and their brand versions have the same active ingredient, strength and dose. Generics must meet the same high standards for purity, quality, safety and strength.* Plus, generics normally cost 30 to 60% less than the brand versions. With generics, you get the same quality for less money.

How does Generic Premium work?

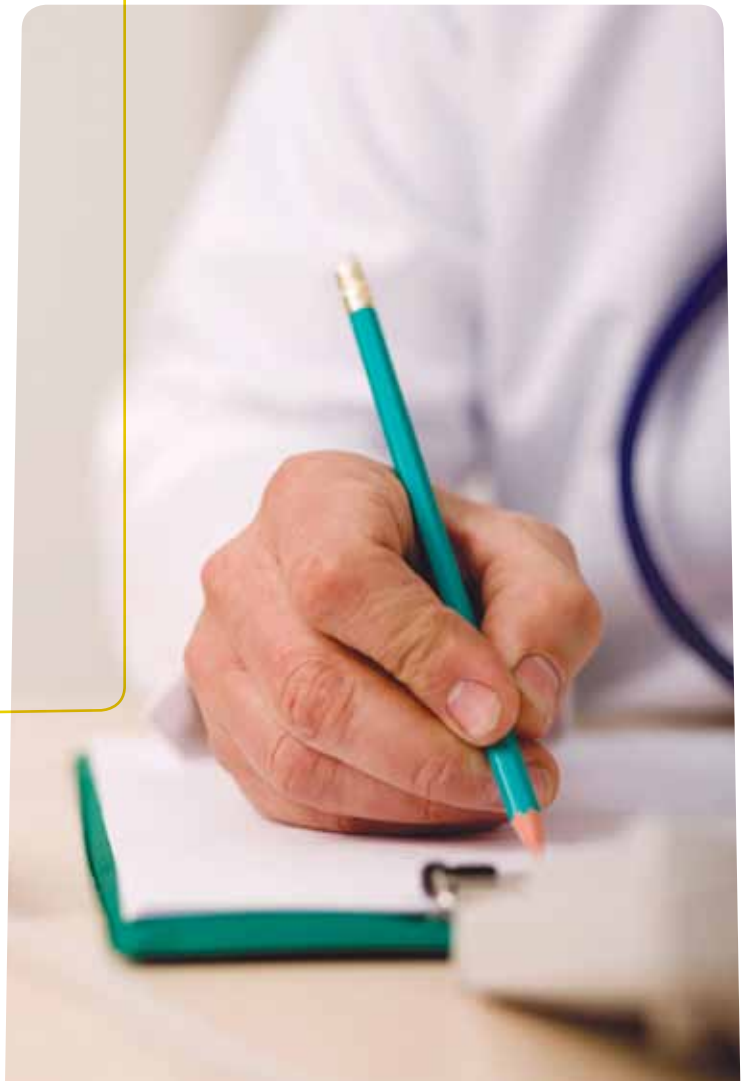

Talk to your doctor before you switch or stop taking any drugs. If you and your doctor agree that a covered drug is a good option, you'll need a new prescription. You can choose to fill the prescription through home delivery or at a local pharmacy.

* Required by the U.S. Food and Drug Administration (FDA).

Drug coverage at a glance

The Generic Premium drug list includes products used for the health needs and conditions below, plus many more. See the next pages for a list of covered drugs.

- Attention deficit hyperactivity disorder (ADHD)
- Arthritis
- Asthma
- Birth control
- Depression
- Diabetes drugs and supplies
- Enlarged prostate
- Glaucoma
- High blood pressure
- High cholesterol
- Infections
- Osteoporosis
- Overactive bladder
- Pain
- Prenatal vitamins
- Seizures
- Sleep aids
- Ulcers

TIER 1

acetic acid/aluminum acetate (Domeboro)*

acetic acid/hydrocortisone (VoSol HC)*

acetylcysteine (Mucomyst)*

acyclovir (Zovirax)*

adapalene (Differin)*

albuterol – oral **QL**

albuterol sulfate (Proventil)* **QL**

albuterol/ipratropium nebulizer soln (Duoneb)*

alclometasone dipropionate (Aclovate)*

alendronate (Fosamax)* **QL**

allopurinol (Zyloprim)*

alprazolam (Xanax, Xanax XR)*

amantadine hcl (Symmetrel)*

amcinonide (Cyclocort)*

aminophylline

amiodarone hcl (Cordarone, Pacerone)^

amitriptyline hcl (Elavil)*

amlodipine besylate (Norvasc)* **DO**

amlodipine besylate/benazepril (Lotrel)*

amoxapine (Asendin)*

amoxicillin trihydrate (Amoxil, Trimox, various)*

amoxicillin trihydrate/potassium clavulanate (Augmentin, XR)* **QL**

amphetamine salt combo (Adderall)*

ampicillin trihydrate (Principen)*

amylase/lipase/protease (Creon, Pancrease, Pancrease MT, Ultrase, Ultrase MT)^

anagrelide hcl (Agylin)*

anthralin (Drithocreme HP)*

antipyrine/benzocaine/glycerin (Auralgan)*

aspirin/codeine phosphate

atenolol (Tenormin)*

atenolol/chlorthalidone (Tenoretic)*

atropine sulfate (Isopto Atropine)*

azathioprine (Imuran)*

azelastine (Optivar)* **QL**

azelastine (Astelin Nasal)* **QL**

azithromycin (Zithromax)* **QL**

bacitracin/polymyxin b sulfate (Polysporin Ointment)*

baclofen (Lioresal)*

balsalazide disodium

belladonna alkaloids/phenobarbital (Donnatal)*

benazepril hcl (Lotensin)*

benazepril/hydrochlorothiazide (Lotensin HCT)*

benzonatate (Tessalon Perles)*

benzoyl peroxide (Benzagel, Benzac AC, various)*

benztropine mesylate (Cogentin)*

betamethasone dipropionate (Diprosone, Diprolene, Diprosone)*

betamethasone valerate (Betatrex)*

betamethasone dipropionate/propylene glycol (Diprolene AF)*

betaxolol hcl (Betoptic)*

bethanechol chloride (Urecholine)*

bisoprolol/hydrochlorothiazide (Ziac)*

Generic drugs are listed in all lowercase letters.

Brand drugs are listed with a first capital letter.

Tier 1 drugs have the lowest copay. Many Tier 1 drugs are generics.

Tier 2 drugs have a medium copay and offer a good value.

Tier 3 drugs have the highest copay. Many of these drugs treat complex, ongoing conditions and may require special handling.

PA = Prior authorization is needed. In this case, you must receive approval before the drug is covered.

QL = Quantity limits are needed. Some drugs have limits on the amount you receive for each prescription or each month.

ST = Step therapy is needed. You may need to try another drug before we'll provide coverage for the medicine.

DO = Dose optimization is needed. This usually means that you take the drug once a day instead of twice a day.

* Generic versions of these drugs are covered. The brand name in parenthesis is only for reference.

^ These drugs often require your doctor to carefully monitor your dose to make sure the drug works best for you. In general, you shouldn't switch between the brand and generic versions of these drugs. Your plan covers both the brand and generic versions.

† Once a generic is available, the brand version will not be covered.

Key

bisoprolol fumarate (Zebeta)*

brimonidine tartrate (Alphagan)*

bromocriptine mesylate (Parlodel)*

bumetanide (Bumex)*

buprenorphine (Subutex)* **QL**
